Q & A

## Introduction

# What is Shell Eco-marathon?

it is one of the world's leading energy-efficiency engineering programmes for students.

It aims to push the boundaries of what is technically possible and inspire young people to become leading scientists and engineers of future energy solutions.

## Introduction

# What is Shell Eco-marathon?

The programme provides a platform for high school and university teams to explore every aspect of design and technology, using their Science, Technology, Engineering, and Maths (STEM) skills to build their own ultra-energy-efficient cars, and then take them out on the track in competition.
